	Manual Calculation			
	to manual (on the Tools menu, click Options , and then click the Calculation tab). This means Excel will not recalculate automatically when a cell value changes; rather, you must specifically choose to recalculate by pressing F9 (which recalculates only cells in the workbook that need to be recalculated), SHIFT+F9 (which calculates only the active sheet), or CTL+ALT+F9 (which does a full recalculation, regardless of whether cells need to be recalculated). Manual calculation is a good option when you have large, complicated worksheet models that take a long time to recalculate, and you want to be able to make changes to data quickly and save the recalculation process until after you've made all
