Feb. 20, 1804  *Philadelphia Evening Post*, quickly renamed the *Freeman's Journal* begins publication as the organ of the Tertium Quids, moderate Jeffersonians, who oppose the radical city democrats led by Dr. Michael Leib (1760-1822) and their paper, William Duane’s *Aurora*; Pennsylvania Jeffersonians are already divided into radical and conservative factions, the latter including Gov. McKean, Mathew Carey, Tench Coxe, Alexander J. Dallas, Stephen Girard, Manuel Eyre and Samuel Wetherill; while both groups believe in economic development, the Quids are more tolerant of inequality and protective of property rights; the radicals believe that inequality comes only from special privileges and can be controlled by direct democracy. (Shankman)

Feb. 21, 1804  Richard Trevithick’s locomotive makes the run required by the £535 bet made by ironmaster Samuel Homfrey (1761-1822) of Pen-Y-Darren with Anthony Hill of Plymouth Iron Works that it can haul 10 tons of iron the length of the Pen-Y-Darren tramway; it hails 10 tons of iron, 70 men and 5
empty cars for 9.5 miles at 5 MPH; is a technical success but the 5-ton weight breaks the flanged rails on several occasions, and its tall stack and projecting flywheel require the cutting back of brush and the like; the locomotive is used sporadically into July, but a London delegation never keeps its promise to view it; it is then used as a stationary engine. (Dickinson, Rolt)

Apr. 15, 1805  Hoboken ferry leased to Peter Voorhis at $350. (Stokes)

Apr. 1805  Mail stage coach line extended from Pittsburgh to Wheeling. (PADA)

Apr. 1805  John Cox Stevens (1785-1857), son of John Stevens, arrives in England to interest Boulton & Watt in his father’s high-pressure tubular boiler. (DuBois)

Apr. 22, 1805  Baltimore & Frederick Town Turnpike Road Company organized; Jonathan Ellicott, Pres. (Williams/Frederick)

May. 6, 1805  Associates of the Jersey Company approve form of ferry lease. (MB)

May 6, 1805  County seat of Wayne County, Pa., moved from Milford to Bethany. (Long)

May 10, 1805  Post office established at Yellow Springs, Ohio, which prior to the coming of the railroad in 1846 is a mere crossroads. (Broadstone)

May 14, 1805  Name of seat of Fairfield County, Ohio, changed from New Lexington to Lexington. (Long)

May 26, 1805  Napoleon creates the puppet Kingdom of Italy with himself as King; goes
on to annex Genoa and Piedmont on June 4. (Schom, Mostert)

May 29, 1805  Ward, Simpson, Rogers & Co. secure the mail contract between Boston and Philadelphia; establish Mail Coach at $8.00 and Industry Line of stages at $5.00 between New York and Philadelphia; soon amalgamated with old line as Cumming, Ward & Co. (Lane)

May 31, 1805  On behalf of his father John Stevens, John Cox Stevens receives a British patent for a system of generating high-pressure steam using a series of small boilers instead of a large one. (Patnt)

June 2, 1805  Future PRR civil engineer Samuel Wright Mifflin (1805-1885) is born eastern Lancaster County, son of Jonathan Mifflin and Susannah Wright Mifflin of Wrightsville. (SadsburyMoMeet)

June 8, 1805  Future VP of New Jersey Railroad John Peter Jackson (1805-1861) born at Aquackanonck, N.J. (present-day Passaic), son of Peter Jackson (1777-1859) and Hester Brinckerhoff Jackson. (litchfieldhistsoc, BioEncycNJ)

June 11, 1805  A fire levels most of Detroit; newly appointed territorial Judge Augustus Elias Brevoort Woodward (-) is a close friend of Jefferson and shares his bent for architectural idealism, and he has also secured a copy of L’Enfant’s plan for Washington, D.C., as a guide; he designs a new plan for Detroit with 200 and 120-foot wide radial avenues and large circular parks as the center of each ward, a scheme far too grandiose for a frontier settlement; a later governor, Lewis Cass, alters the plan and narrows most of the streets, although some elements of the original survive. (Dunbar)

June 15, 1805  Future Chicago entrepreneur and railroad promoter William Butler Ogden (1805-1877) born at Walton, N.Y. (AmScsflMen)

June 1805  Matthew Boulton refuses to build John Stevens’s high-pressure engine. (DuBois)

July 4, 1805  Treaty of Fort Industry, Ohio, purchases Indian titles for the lands lying west of the Cuyahoga River and north of the Treaty of Greenville line as far west as the western boundary of the Western Reserve 120 miles west of the Pennsylvania state line or the parallel just west of present-day Sandusky; on the same day, the Connecticut Land Company buys the portion of the
Western Reserve west of the Cuyahoga River. (IndLndCessions, Hubbard, Sipe, Trumbull/Mahoning)

July 8, 1805 Potomac Company directs Leonard Harbaugh to examine the Shenandoah River to the highest practical point of navigation. (Kapsch)

July 13, 1805 Oliver Evans advertises in Philadelphia Gazette that his rebuilt steam dredge *Oruktor Amphibolos* will run around Centre Square at 25 cents for viewers before being launched; the axles had broken under the weight on the first attempt to move it; the workmen replaced them without pay and are to be reimbursed for their labor with the proceeds of the exhibition; Evans enjoys the victory of literally running circles around Benjamin H. Latrobe’s heavy low-pressure engines in the water works. (Bathe, Ferguson - however, there are no eyewitness accounts other than Evans’s own notice - in an 1811 letter, Evans claims to have moved a wagon with a load equal to 200 bbl. flour with a 5-6 HP engine)

July 1805 Oliver Evans’s steam-powered amphibious dredge, *Oruktor Amphibolos*; moves by steam to the Schuylkill River and by water from the Schuylkill to the Delaware and upstream as far as Beverly at about 4 MPH, taking advantage of the incoming tide; however, by the end of the year, the Board of Health is still complaining about the dredge not working well. (Bathe)

July 1805 Postmaster General Gideon Granger contracts with Andrew Marshall of St. Clairsville, Ohio, to establish a line of mail coaches over Zane’s Trace between Wheeling and Frankfort, Ky.; however, there is no regular service other than post riders west of Wheeling until 1809. (Holmes/Rohrbach)

July 1805 British High Court of Admiralty upholds the British seizure of the American ship *Essex* that had been on a voyage from Barcelona to Havana by way of Salem, Mass.; such broken voyages were a means for neutrals to avoid British reprisals when trading between belligerents and their colonies, pretending that the cargoes were first imports to and then exports from the U.S.; Britain had winked at this process because it sustained its own commerce and wealth, but growing desperation and the envy of British shipowners have forced a change in policy that eventually leads to war with the U.S. (Mostert, Sharrer)

July 1805 Britain escalates seizures of U.S. ships trading between her European enemies and their colonies in the West Indies; the number of U.S. ships taken as prizes between 1805 and 1807 rises to 469, from only 59 between 1800 and 1805; risk raises prices and profits. (Sharrer)

July 16, 1805 Mount Vernon, Ohio, platted by Joseph Walker, Thomas B. Patterson and Benjamin Butler (1779-1872). (Hill/KnoxCo)
July 23, 1805  British Admiralty courts rule that cargoes begin carried in American vessels between French West Indies and France are subject to seizure unless truly bound for an American port; British seizure of U.S. shipping increases. (EAH)

July 29, 1805  New York City Council offers a premium of $500 for the first shipment of 10 chaldrons (29.7 tons if the Newcastle chaldron, 16 tons if the London chaldron) of coal brought from a mine within the state within 10 miles of tidewater or the Hudson River; no such coal deposits exist. (Stokes)

July 29, 1805  Ferry established across the East River between Grand Street, Manhattan, and Williamsburg, by Richard M. Woodhull, a New York merchant who later lays out Williamsburg as a speculative venture. (Stokes, Stiles)

Aug. 9, 1805  Austria joins Third Coalition against France. (Mercer)

Aug. 8, 1805  Pioneer railroad contractor and CNJ official John Owen Sterns (1805-1862) born at Billerica, Mass. (RREmply)

Oct. 8, 1805  Coalition of moderate Republicans, Federalists and Germans reelects Gov. Thomas McKean and defeats insurgent Democratic candidate Simon Snyder by slim margin of 4,766 votes; coalition also gains the House, while Democrats retain one-vote margin in the Senate; McKean carries Philadelphia proper, while Snyder carries the suburbs. (Higginbotham)

Oct. 20, 1805  Napoleon forces the surrender of a 23,000-man Austrian army under Gen. Karl Mack (1752-1828) at Ulm; the Austrians had made a precipitous advance into Bavaria without waiting for their Russian allies, who now withdraw eastward into Moravia. (Blanning, Mostert, Lieven)

Oct. 21, 1805  British Navy under Admiral Horatio Nelson (1758-1805) destroys the Franco-Spanish fleet at Trafalgar, securing British dominance of the seas at the cost of his own life; the loss of its navy hampers Spanish trade with the Americas and its overseas colonies, leading to food shortages. (Mostert, wiki)

Oct. 26, 1805  Oliver Evans publishes *The Abortion of the Young Steam Engineer’s Guide*, the hastily-composed section of what he had hoped to be a longer work on the principles of the steam engine and a companion-piece to his earlier *Young Mill-wright and Miller’s Guide*; Congress’s failure to extend his patents and the expenses of developing his high-pressure engine have left Evans in debt and depressed. (Bathe)

Oct. 30, 1805  At the Treaty of Vincennes, the Piankishaw cede a tract of land in southeastern Illinois consisting of most of the drainage basin of the Little Wabash River. (IndLndCessions)

June 22, 1807  *U.S.S. Chesapeake*, a 38-gun frigate which is not in fighting order with its cannon stowed, is attacked without provocation by *H.M.S. Leopard* off the Virginia capes, killing 4 Americans and wounding 23; the British take four American sailors who are refugees from the Royal Navy, including one Jenkin Rutford, whom the Admiralty wanted for verbally abusing his former captain on the streets of Norfolk and for which he is later hanged; the other three, being Americans rather than British subjects, are imprisoned; Norfolk is rocked by rioting against any British parties still ashore, and the port is closed to the Royal Navy; Britain insists that its subjects are subjects for life, and cannot change that status by emigration or naturalization in the U.S.; the Royal Navy is desperate to obtain the 12,000 sailors it needs every year to keep up its strength and to discourage desertions by shows of force and draconian punishments; at the same time, American cannot man its burgeoning neutral merchant marine and Navy with its own citizens and offers wages more than twice those of the Royal Navy; many of the deserting British subjects are actually Irishmen with no love for the British Empire. (Mostert, Cope Diary, Taylor)

June 25, 1807  Napoleon and Tsar Alexander I (1777-1825) make peace at Tilsit; treaty signed July 7 on a raft in the middle of the Niemen River; Russia recognizes the Grand Duchy of Warsaw as a French puppet state, although it remains uneasy at the prospect of a hostile state on its western doorstep and anything that suggests the restoration of Poland as an independent state; Napoleon accedes to Tsar Alexander’s demand that Prussia not be totally partitioned and in return accepts Alexander’s offer of mediating a peace with Britain on condition that if no settlement is reached by Dec. 1, Russia will join France against Britain and join the Continental System. (EAH, Schom, Mostert, Lieven)

June 26, 1807  Milford & Owego Turnpike Road Company incorporated in Pa. to build from Milford on the Delaware River to the New York state line in the direction of Owego on the North Branch of the Susquehanna River; part of a short-cut from New York across northern New Jersey and northeastern Pennsylvania to the Genesee Country. Dec. 18, 1807  U.S. Senate passes a bill, 22-6, called for by Pres. Jefferson to impose an embargo on all foreign trade. (Pancake)

Dec. 22, 1807  U.S. passes the Embargo Act prohibiting all U.S. vessels from engaging in foreign trade over strong New England opposition in the House; the act reflects Jefferson’s naive and sentimental attachment to an ideal of rural, self-sufficient isolation and dislike of all things commercial and maritime; the main victim is the American merchant marine, based almost entirely in New England and the Mid-Atlantic States and employing 60,000 men; in fact, the French could do nothing to interfere with U.S. ships anywhere outside Continental Europe, leaving the U.S. the very lucrative West Indian and China trades; U.S. exports fall from $108 million in 1807 to $22 million in 1808; smuggling becomes endemic along the borders with Canada; since most U.S. exports were farm products, farmers are among chief sufferers, along with merchants, sailors and others involved in overseas trade; impact is especially severe in New York City; Philadelphia's losses are offset by a boom in domestic manufactures; price of flour in Baltimore falls from $7.25 per bbl. to $4.50; the Embargo serves to revive the Federalist Party, particularly in New England, and eventually threatens Republican unity in the Middle Atlantic States. (Higginbotham, Mostert, EEBrown, Taylor, Pancake)

Dec. 28, 1807  John Stevens writes to Robert R. Livingston asking that they combine their two interests and allow him to operate his own steamboats; also states his opinion that Livingston and Fulton’s New York monopoly is unconstitutional if applied to interstate commerce. (DuBois)

1807  U.S. foreign trade peaks before the Embargo; $138 million in imports and $108.3 million in exports; by 1814, it has fallen to $13 million in imports and $7 million in exports. (Rothbard, Arthur)

1807  On the eve of direct American involvement in the European wars, before the Embargo stifles trade, New York City’s imports are valued at $7.6 million, up from $1.4 million in 1790 and nearly double those of Philadelphia; New York exports are valued at $26 million, up from $1.4 million in 1790. (Trager)

1807  Flour inspections at Baltimore peak at 479,429 bbl.; price is $6.00-7.25; then collapse under the Embargo. (Sharrer)

1807  Trenton & New Brunswick Turnpike (now George Street and U.S. Route 1) completed; it is laid out as a straight line for most of its distance and is often called the “Straight Turnpike,” as opposed to the old road that meanders through Kingston and Princeton. (Thompson)
