Judge Fullam sets hearings for Mar. 25 on question of whether Penn Central is to be reorganized under the 3R Act.

U.S. Supreme Court reverses the Circuit Court of Appeals ruling that let the National Association of Railroad Passengers sue Amtrak over service abandonments; Justice William O. Douglas dissents, following his consistent New Deal philosophy that the courts exist to protect the
“little guy”; he holds that the purpose of the Amtrak law was to “protect the railroad passenger,” not to preserve the most viable passenger service from extinction; he calls Amtrak a “for-profit corporation,” and holds that the courts are the citizen’s only safeguard against business or bureaucratic “absolutism”; the Court’s ruling limits suits against Amtrak to those brought by the Attorney General or by employees seeking redress; this ends the practice of appealing passenger service cuts to state regulatory agencies or the ICC; now the only way to affect service levels is to lobby Congress, so that all Amtrak service and route decisions become politicized. (414 US 453, RyAge, Wilner)
